

ELVIS KIPCHUMBA

Software & Devops Engineer

Nairobi, Kenya • (254)723456194 • elviskipchumba60@gmail.com • [Linkedin](#) • [Github](#)

SUMMARY

Solution-oriented Software Engineer with over one years of experience designing, building, and deploying software applications in cloud environments (AWS). Transitioned from DevOps to Software Engineering, gaining hands-on expertise in cross-domain systems. Passionate about AI and its practical applications. Actively seeking to transition into Technical Architecture to leverage my technical versatility and cloud proficiency for greater impact and growth.

WORK EXPERIENCE

EXELIENT TECHNOLOGIES

Nairobi, Kenya

Software & Devops Engineer

October 2023 - Present

- Delivered solution demos and pitched technical improvements, contributing to onboarding of 2 new clients to the company's reconciliation tool.
 - Worked closely with clients to gather requirements, resolve technical queries, and ensure customer satisfaction.
 - Designed cost-optimized, auto-scaling AWS architectures using spot instances and monitoring dashboards, reducing infrastructure costs by 20%.
 - Designed and built a scalable backend system capable of handling 1M+ monthly requests with auto-scaling and CI/CD integration.
 - Resolved production incidents including API latency and deployment failures, reducing downtime by 30%.
 - Enhanced backend API documentation using Swagger and integrated AI-based tooling for clarity and maintainability.
-

EDUCATION

Bachelor of Science in Electrical & Electronics Engineering

Sep 2018 - Sep 2023

University of Nairobi

- *Second Class Honours (Upper Division)*
- *Machine Learning & Artificial Intelligence*

Secondary School Education

Feb 2014 - Nov 2017

Maseno School

SKILLS AND EXPERTISE

- **Soft Skills:** Team collaboration, Analytical Thinking, Continuous Learning & Problem Solving
- **Technical Skills:** Cloud Architecture (AWS & Azure), DevOps Principles, CI/CD, System Design, RESTful APIs, Machine Learning, Artificial Intelligence (A.I), Programming (C++)
- **Cloud & DevOps:** AWS (EC2, Lambda), Jenkins, Terraform, Ansible, Docker & Kubernetes
- **AI/ML:** OpenAI API, NLP (SpaCy), TensorFlow, LLMs (GPT) & LangChain,
